## EDUCATION

**Rwanda Coding Academy (RCA)**

*Advanced Level, Software Programming & Embedded Systems | Expected Graduation:* ***2027***

**Lycée Saint Jérôme Janja**

*Ordinary Level | Graduated* ***2024***

## EXPERIENCE & SELECTED PROJECTS

**TradeWise AI**

*Independent Researcher*

- Conducted research investigating whether machine learning can predict seven-day crop price changes for farmers and traders in Rwanda.
- Analyzed historical market-price data, built machine-learning models, and tested how well they predicted future crop price changes.

**Industrial Attachment Program (IAP)**

*Full-Stack Developer • Rwanda Coding Academy*

- Built a digital six-month attachment system used by 121 students, replacing paper-based logbooks with digital ones students could access anytime.
- Developed with Next.js, NestJS, PostgreSQL, and Prisma.

**Shop Management System**

*Full-Stack Developer • Freelance / Client*

- Developed a sales and inventory system for a paying client, used by 3 workers and an admin to verify sales and update stock accordingly.

## ENTREPRENEURSHIP & LEADERSHIP

**Water Entrepreneurship Initiative**

Founder

• Launched a community water distribution business during the COVID-19 lockdown, serving 22 customers daily.
• Managed daily operations, customer service, and finances.

**Business Club**

Vice-President • Rwanda Coding Academy

• Introduced an initiative helping young teen mothers return to school and start small businesses with money raised through club contributions.

**Kindergarten Fruit Support**

Contributor

• Used some of the money from freelance work to provide fruits for kindergarten children in my village to support their nutrition.
